	AS Level ICT **Price:** £2.99	AS Level ICT and A2 Level ICT are the perfect accompaniment for students studying A-Level ICT or Computing courses. All information is presented through easy to follow screencast video tutorials. AS Level ICT take you through many AS ICT theory topics including encoding data, validation, problems with ICT systems, HCI and many more. The A2 Level ICT app covers theory topics including network topologies, the internet, security, databases, systems life cycle and again many, many more! Each ICT app contains over 8 hours of detailed guidance which covers almost everything a student needs to know at A-Level. Each
	A2 Level ICT **Price:** £2.99	individual video lasts between 10 and 20 mins and also contains practical advice on how to answer typical exam questions. The videos were originally created to follow the WJEC AS ICT syllabus however the majority of the content will be relevant to A Level ICT courses offered by other exam boards.

Subjects specific apps for the iPad: Business Studies

Business Studies Apps		Description
	Study Business Nickels **Price:** Free (includes in app purchase for the entire book)	The Study Business mobile app was built with the student in mind. You are on the go, and your study tools should be too. Features of the app include: • Flashcards of every key term and definition from the textbook • Review of fundamental graphs to help you understand economic principles • Customizable self quizzes • A matching game which helps make learning key terms and concepts more engaging and fun. • Search tool to look up any term or concept found anywhere in the app.
	GCSE Business Studies Bitesize Last-minute Learner **Price:** £1.49 **Note:** iPhone app only, but will work on the iPad	Extending the range of BBC Bitesize resources, this is the perfect app for last-minute GCSE revision. All essential information is consolidated into bite-sized chunks, with the option to add your own notes and bookmarks for ready reference. You can test yourself with multiple-choice quizzes for each topic, save your results to see where you can improve and share your results with friends. GCSE Bitesize Last-minute Learner: Business Studies covers the following main topics: • Business types and objectives • Business production • Business finance • People in business • Business and marketing • The business environment
	Brand Master **Price:** Free	This game is a fun, educational way to learn about the evolution of well-known brands - from the food we eat to the products we buy. To play the game, simply use the touch screen to drag the presented logos in their proper order as they evolved over time, with the earliest on the left, and the latest on the right. The faster you order the logo set correctly, the more points you'll earn.
	I Am Learning: GCSE Business Studies **Price:** £1.49 **Note:** iPhone app only, but will work on the iPad	I am learning GCSE BUSINESS STUDIES Revision app has 400 UNIQUE QUESTIONS across the curriculum. Choose to play the game or use the default template to revise. Test yourself and see your results in easy to use reports. The app comes from one of the UK's most successful online revision providers, I am learning, which is used by over 300,000 people. I am learning GCSE BUSINESS STUDIES incorporates the main topics across all major exam boards making it an ideal resource to help improve results. Features include: - Play the game to make revision more fun

Business Studies Apps		Description
		- Questions randomize each time - Simple reports with red, amber, green indicators for performance - See which questions you have answered incorrectly (see what you don't know) - Gap analysis – see which questions you frequently answer incorrectly
	Get2Know Business: Foundations **Price:** £1.49 **Note:** iPhone app only, but will work on the iPad	Get2Know the best way to learn! Learn, explore and test your way to a comprehensive understanding of the foundations of our business economy with Get2Know. This app contains clear and detailed content, a carefully designed structure and multiple ways to learn. Get2Know has been created for students revising for exams, interview candidates, prospective students, would be business owners, and in fact for anyone who simply wants to Get2Know. Content: Business 1 Foundations - four full topics in this one app •A Basis of Business includes the relationship between the consumers, the business producer and the market place. It covers market types, market forces and factors as well as types of production. •Companies looks at the motivation for starting a business, business options and types of business, including their characteristics, advantages and problems. •Economies sets business in its economic context including the economic problem, opportunity cost, how economies operate, types of economies and the role of private and public businesses. This uses case studies from the transport sector. •External influences looks at government policy, the opportunities and threats to business from public spending, monetary policy, fiscal policy, inflation, taxation, exchange rates, trade, legal structures, consumer rights, social change, responsibilities and ethics.
	Get2Know Business: Management **Price:** £1.49 **Note:** iPhone app only, but will work on the iPad	Get2Know the best way to learn! Learn, explore and test your way to a comprehensive understanding of the foundations of business management with Get2Know. This app contains clear and detailed content, a carefully designed structure and multiple ways to learn. Get2Know has been created for students revising for exams, interview candidates, prospective students, would be business owners, and in fact for anyone who simply wants to Get2Know. Content: Business 4 Management - four full topics in this one app •Internal organisation considers why and how businesses are organised. It outlines functional and hierarchical organisation and the typical roles of staff, how responsibilities are divided, department structures and delegation. Advantages and disadvantages of traditional systems are explained and other alternative forms of management considered. •Recruiting & training explains the importance of good recruitment. Methods of both internal and external recruitment are explained along with the recruitment process including advertisements, interviews, methods of selection and employment contracts. This unit also includes methods and types of training and a section on trade unions. •Workforce motivation looks at what motivates employees, options for pay, different forms of reward and wages. It outlines some specific ways used to motivate staff and the changes towards flexible working. •Communication includes an outline of the forms of communication used in business and the importance of choosing the right methods for different business situations. It then uses examples to look at why communication fails and good and bad practice.

Business Studies Apps		Description
	Get2Know Business: Finance **Price:** £1.49 **Note:** iPhone app only, but will work on the iPad	Business: Finance Get2Know the best way to learn! Learn, explore and test your way to a clear understanding of Business Finance with Get2Know. This app contains clear and detailed content, a carefully designed structure and multiple ways to learn. Content: Business 1 Foundations - four full topics in this one app •Objectives and Growth ranges from the fundamental objectives for a business through to the ways to assess success. It considers the threats to growth and how businesses achieve growth both internally and externally. It explains economies and diseconomies of scale as well as all forms of merger. •Sources of Finance considers both internal and external finance options, depreciation of assets and the wide range of finance options available to different businesses. •Financial Planning describes how planning helps a business. It explains business costs including capital expenditure, revenue expenditure, fixed and variable costs plus breakeven analysis with examples calculations and graphs •Accounts and Records explains why businesses need accounts and the types of records needed. It includes trading, profit and loss and balance sheets with explanation of key terms and measures of profitability. Examples are used showing what is included in different accounts and how performance checks like ROCE and acid test ratio are helpful to a business.

Subjects specific apps for the iPad: Maths

Maths Apps		Description
	Quick Graph **Price:** Free	It is a powerful, high quality, graphic calculator that takes full advantage of the multitouch display and the powerful graphic capabilities of the iPad and iPhone, both in 2D and 3D. A simple, yet intuitive interface that makes it easy to enter and/or edit equations and visualize them in mathematical notation. It's capable of displaying explicit and implicit (opt) equations as well as inequalities (opt) in both 2D and 3D, in all standard coordinate systems: Cartesian, polar, spherical and cylindrical, all with amazing speed and beautiful results, which can be copied, emailed or saved to the photo library.
	Khan Academy **Price: Free**	The Khan Academy app is the best way to view Khan Academy's complete library of over 3,500 videos. It covers a large range of topics, including math, science topics such as biology, chemistry, physics, humanities, finance and history.
	MyScript Calculator **Price:** Free	The MyScript Calculator is a powerful app that enables users to write an equation or a sum on the iPad. The app then converts the symbols and numbers to digital text and delivers the result in real time on the screen.
	Math Ref **Price:** £1.49	Math Ref is a reference tool for the iPad. Browse over 1,400 formulas, figures, and examples to help you with math, physics, chemistry and more. Use an expanding list of helpful tools such as a unit converter, quadratic solver, and triangle solver to perform common calculations.

Maths Apps		Description
	Pocket CAS **Price:** Free **Pocket CAS Pro** **Price:** £6.99	• 2D Plots: Quickly create 2D Cartesian, polar or parametric plots. • 3D Plots: PocketCAS draws 3D plots. • Calculus: Calculate limits, derivatives, integrals and taylor expansions. • Linear Algebra: Invert and multiply matrices or calculate determinants, eigenvalues and much more. • Algebra: Perform integer and polynomial factorization and division, use permutations, and more. • Solving: PocketCAS will solve almost any equation for you. It even supports systems of linear equations and ordinary differential equations. • Scripting: PocketCAS' C-style scripting language allows you to define custom functions, use conditional expressions, loops and also supports recursion. • Physical Units: Constants and units are provided out of the box. Simply enter physical formulas with the corresponding units and convert results to the units you prefer. Pocket Pro enables students to plot more than one function at a time.
	GraphBook **Price:** Free	Graphbook is a collection of interactive graphing examples from MathStudio. The full version of the app is called MathStudio. See below for details.
	MathStudio **Price:** £13.99	MathStudio is the most comprehensive math app available for iPhone and iPad. Whether you need a simple calculator to do your finances or a replacement for your TI graphing calculator, MathStudio is the most powerful and versatile calculator available on the App Store. CALCULATOR From basic calculations to college calculus, MathStudio is a full featured scientific calculator with over two hundred functions. Browse the entire list in our online manual. http://www.mathstudio.net/manual ALGEBRA MathStudio is powered by MobileCAS, our powerful and lightning fast computer algebra system that beautifully typesets your answers. CALCULUS Solve limits, derivates, integrals and more! 2D GRAPHING Graph equations with speed and ease you never thought was possible! MathStudio graphs 2D function, parametric, polar, implicit, contour, vector fields, fractals and images with amazing speed and accuracy. 3D GRAPHING Rotate, pinch and graph 3D equations in real-time! MathStudio graphs 3D functions, parametric, spherical, cylindrical and vector fields. TIME GRAPHING MathStudio is the first and only graphing app that can also graph not only
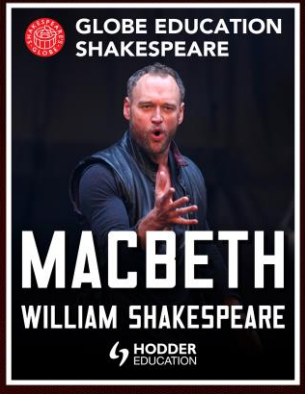

Maths Apps		Description
		in space but in time. Use the T variable to create animated plots that plot graphs in space and time! STATISTICS Plot lists of numerical data in scatter, histograms, box and probability plots! MathStudio even includes an advanced regression analysis package, choose from several regression functions or create your own! SCRIPTING MathStudio is the ONLY calculator app that also lets you create scripts in our powerful programming language that supports variables, loops and even recursion.

Subjects specific apps for the iPad: English

| English Apps		Description
